

French Knowledge organiser-Year 6 transition

On the next page, you will find a grid, called 'sentence builder'. It will help you construct sentences in French right from the beginning. We will use grids similar to that one all year long.

How to use the grid:

- Practise saying words and sentences from the grid by copying and pasting them into Google translate, then clicking on the loudspeaker icon, as illustrated below:
- Write as many different sentences as possible from the grid, then translate them into English.
- Take the quizzes on the last page to check how much you can remember.
